I have data to support the above surface water use reductions due to conservation efforts. YES    NO

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or Water Rights in California, and (3) Appropriation of Water in California.

Water to this office. We have several pamphlets available. They include: (1) Statements of Water Diversions and Use, (2) Information Pertaining to Appropriators.

Proposes a new appropriation upstream from their diversion, and (3) Assists the State to determine if additional water is available for future purposes of riparian users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone with specific exceptions. The filing of a statement (3) determines the State to determine if additional water is available for future use.

Statements of Water Diversions and Use must be filed by riparian and pre 1914 appropriative users set forth in Water Code section 5100 only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water to the natural stream a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream a different watershed to the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users.

The same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in

form the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land without reservation of the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of ground water.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus generated by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Division and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assesses the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

Statement of Water Diversions and Use is available for future appropriators. This statement enables the State to notify such users if someone proposes a new appropriation use, (2) enables the State to notify such users if there is a surplus upstream from their diversion, and (3) assists the State to determine if additional water is available for riparian and non-riparian land and for storage upsteam.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statement of Water Diversions and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpond Construction Prior to 1969"
- "Appropriation of Water in California"

Statements of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water appropriated from their diversion, and (3) assists the State to determine if additional upstream from their diversion, (2) enables the State to notify such users if someone proposes a new appropriation use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
STATE WATER RIGHTS BOARD

S 469

**STATEMENT OF WATER DIVERSION AND USE**

*This statement should be typewritten or legibly handwritten.*

A. Name of person diverting water Estate of James W. Mapes  
Address Litchfield, Calif.

B. Name of body of water or point of diversion Long Reservoir  
Tributary to unknown

C. Place of diversion SW 1/4 NE 1/4 Section 15 Township 35N Range 10E AD 2000  
Lassen County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Long Reservoir

E. Capacity of diversion works just above

Capacity of storage reservoir 87 acre feet

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
				X	X	X	X	X	X	X	X	X	

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 100 cattle during grazing season

Maximum annual water use in recent years 8000

Minimum annual water use in recent years 4000

Type of diversion facility: gravity X, pump none

Method of measurement: weir none, electric power meter none, water meter none, estimate X

F. Purpose of use (what water is being used for) stock watering

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

H. Year of first use as nearly as known 1950

I. Name of person filing statement Julian W. Mapes

Position Manager Organization James W. Mapes Estate

Address PO BOX 11 Litchfield, California

I certify that the foregoing statement is true and correct to the best of my knowledge and belief.
